

# THAMES VALLEY 4x4 CLUB

## SITE INFORMATION SHEET

### Chichester

- Description:** A large disused quarry located in the countryside north of the A27. A lovely site that is within easy reach of the Thames Valley area.
- Off-Roading:** The site consists of a shallow, open quarry that was previously partly used as landfill. Criss-crossed by a series of tracks it features mud and rock based climbs and descents along with some large amounts of water (seasonal). An area of scrubland provides safe driving for shiny vehicles whilst muddy axle twisters provide more traditional mud based entertainment. Around the perimeter a wooded drive provides a challenging "green lane" experience
- Facilities:** The club trailer provides toilet facilities and a burger van is available for snacks. There is plenty of on-site parking with a large car-park (surfaced in places)
- Directions:** Leave Southbourne on the A259 heading east to a village called Nutbourne. Turn left in the village into a road called Broad Road. Follow Broad Road north and cross the A27, the road now becomes Cheesmans Lane.. Turn left at the end into Common Road and then left into Marlpit Lane, the site is then a few hundred yards down on the left.
- GPS: Marlpit Lane, Emsworth, Chichester, PO10 8EQ      OS MAP REF: SU782078**

- Warnings:**
- On-site:** Some of the slopes slip sideways raising the possibility of a slide or roll, check climbs/descents before you drive them! The water can be deep!  
Some quarry machinery exists on-site, do not approach any machinery and do not permit children to climb on any items.  
There are some internal fences (often hidden in the bushes and scrub), take care to go around them and do not break down the fences. There are some metal "vent" tubes where landfill has occurred. Avoid running into the tubes and do not use them for recovery!
  - Off-site:** Some of the roads approaching the site (particularly from the north) are narrow and run through small villages, caution is advised.
